Stated dimensions are measured to the exterior boundaries of the exterior value and the centerline of interior demising walls and in fact vary from the dimensions that would be determined by using the description and definition of the "Unit" set forth in the Declaration (which generally only includes the interior airspace between the permeter walls and excludes interior structural components). Additionally, measurements of fooms set forth on any floor plana are generally taken at the greatest points of each given room (as if the room were a perfect rectangle), without regard for any cubuds. Accordingly, the area of the actual room will typically be attentioned in the set wall and the actual room will typically be attentioned by the stated engine time interiors are approach to change.
